PROTECT WHAT REALLY MATTERS

Every day we work with you with passion, skill and enthusiasm on challenging issues related to the use of personal protective equipment (PPE) in the workplace. We will do everything we can to ensure that you get home safely to your loved ones at the end of the day. We see it as our mission to create an even safer working environment and to minimize health risks.

The first edition of the Protect brochure now in front of you, provides a PPE product selection divided into eight main groups. Products that we usually have in stock, so that we can quickly provide you with the desired PPE. From arm and hand protection to hearing protection and from work clothing to head protection. You will find it in the Protect brochure.

In this issue, take a quick look at the PPE that offer added value for you and contact us.

We are ready to serve you! <<<

Our hands and arms are vital in everyday activities, both in our work and our private lives. Hence the importance of

wearing the right hand and arm protection. Work gloves protect the hands of employees who work in close contact with chemicals and other harmful substances. Choosing the right work gloves ensures the hands and arms are optimally protected and reduces the risk of accidents in the workplace.

REAL PEOPLE. REAL WORKWEAR.

CATALOGUE 2021

PACKED WITH OVER 60 YEARS OF KNOWLEDGE

BLÅKLÄDER
WORKWEAR

BLAKLADER.COM

Workwear is a collective name for clothing that is required to perform duties in a recognisable, uniform and representative way, or to protect workers in a potentially hazardous environment. Comfort and ease of work are two of the key features of workwear. The proper workwear can also reduce the occurrence of injuries and work-related accidents, especially in work environments where regular work clothing doesn't offer enough protection from heat, cold or chemicals.

EMPLOYEE HEALTH COUNTS

Employee health has received increasing attention in recent years. Rightly so, of course. For example, safety in the workplace has become an increasingly important topic for many companies. In the past year, this theme has been given even more meaning by the corona pandemic.

Although it may seem far away now... we will soon leave corona behind us. However, the theme of "employee health" will not disappear. An environment in which employees can carry out their work as productively and safely as possible is and remains of the utmost importance.

Accidents

Every year there are still 220,000 accidents at the workplace... in the Netherlands! Of these, 2,300 are serious, 60 of which are fatal. The vast majority of accidents - approximately 65% - are caused by falling objects, accidents with machines or falls from a height.

The most serious accidents occur in the industry, construction, trade and transport & storage sectors.

The cause of this is mainly due to two factors;

1. Alert to safety.
2. Balance between safety and other business objectives.

By working on awareness among both the employer and the employee and by showing that employees can work safely and at the same time be productive through the use of the right PPE, these factors can be positively influenced. We support this and offer you the right solution.

In addition to the health aspect, the sustainability theme is also high on the agenda. We can no longer, will and may no longer ignore the impact on our environment and fortunately many companies are taking good steps to make a positive contribution to a sustainable industry. We too are constantly looking for the right solutions and innovations. Some examples of this - at product level - can already be found in this publication. <<<

Hearing protection

Hearing protection is an absolute necessity in loud workplaces. The level at which employers are required to provide hearing protection is 80 dB(A). Hearing damage is among the most common occupational diseases in the Netherlands but can be easily prevented by wearing ear protection. Workers who don't wear hearing protection are gambling with their health.

3M

3M™ E-A-R FLEXIBLE FIT

First earplug that can be inserted with both hands and one hand. Equipped with washable foam, making reuse possible.

- › SNR 35 dB (A) (insertion with 2 hands) and SNR 30 dB (A) (insertion with 1 hand)
- › Compatible with 3M E-A-Rfit Dual-Ear system
- › Dispenser of 100 pairs

Article number 3.13.165.00

3M

3M™ PELTOR X4A

High performance front hearing protection use at high noise levels.

- › Average attenuation value: SNR 33 dB (A)
- › Innovative sealing ring
- › Soft, wide cushions help reduce pressure on the ears and improve comfort
- › Electrically insulated headband

Article number 3.19.380.00

3M™ PELTOR™ X SERIES X-SERIES BLUETOOTH KIT

With the 3M™ PELTOR™ bluetooth kit X-series, in combination with the X Series earmuffs, you stay protected and can still communicate in noisy environments. You just answer that important call without leaving work. You simply attach it to current 3M™ PELTOR™ X Series ear muffs.

- › Designed for communication in noisy environments. Microphone with environmental noise suppression
- › Link with your smartphone via Bluetooth® wireless technology
- › Talk / stream time: about 8 hours
- › Standby time: about 250 hours
- › Charging time: about 3 hours

- › Ventilation channels for better air circulation
- › Antibacterial

» Sizes: 39-42, 43-46, 47-50
Article number 5.61.705.00

When working in risky environments the risk of head injuries is high. That is why head protection is very

important. One of the most serious injuries you can sustain at work is a blow to the head. Proper head protection is therefore crucial or even compulsory in industries where there is a risk of being injured by falling objects, such as construction. Safety helmets are designed to protect workers from these hazards and reduce the chance of head injuries.

Eye and face protection

The eyes are one of the most sensitive parts of the human body. Every year,

many workers are treated for occupational eye injuries. Some eye injury victims are left with permanent vision loss. The most common eye hazards include exposure to chemical splashes, laser operations, hot fluids or airborne particulates such as flying chips or dust. High-quality eye protection can be achieved by using safety glasses, goggles or other types of face protection.

UVEX SPORTSTYLE 9193-376

The *uvex sportstyle* represents a new generation of innovative safety glasses: clear, sporty design comes together with optimum functionality and safety.

3M Science. Applied to Life.™

Safety backed by science.

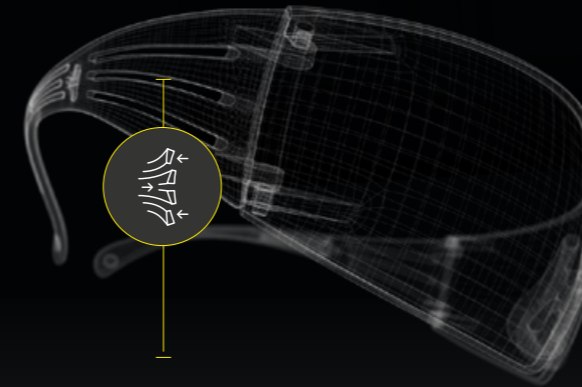

Glasses that protect and fit comfortably.

The 3M™ SecureFit™ family consists of various safety glasses that provide the right protection and comfort throughout the day.

3M™ Pressure Diffusion Temple Technology.

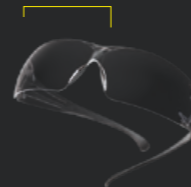

Glasses that do not feel right are not worn. So in order to do its job properly, goggles must feel comfortable all day long and fit snugly to stay in place even with rapid movement. And that is exactly what this technology does, thanks to the ribbed grooves in the temples that distribute the pressure evenly over the head. Large or small, round or elongated. Thanks to this technology, the SecureFit safety glasses are suitable for every head and face shape.

Meet the family!

The newest family members are the 400X Series and the 3700 Series, featuring premium coatings, a soft nose piece and an optional brow guard that provides extra comfort and protection against flying dust particles.

OXXA® COLIMA 8510 VISOR HOLDER FOR THE PURPOSE OF SAFETY HELMETS

This visor holder for the OXXA® safety helmets is, in combination with the OXXA® 8550 visor, ideal for many applications. The black visor holder is easy to attach at all OXXA® safety helmets and can be combined with the OXXA ear muffs with helmet attachment.

- > Made of HDPE
- > The OXXA® 8550 visor is easy to attach

Article number 7.78.510.00

OXXA® COLO 8550 VISOR

The OXXA® Colo 8550 visor offers good protection against flying particles and has an anti-scratch and anti-fog coating. The visor can be combined with the 8500 visor holder or with the 8510 visor holder combined with an OXXA® safety helmet. The spherical visor offers good protection against fast particles, both from the front and the sides.

- > Visor is made of polycarbonate
- > Equipped with an anti-scratch and anti-fog coating

Article number 7.78.550.00

Fall protection

From 2.50 meters there is work at height and from that height the use of fall protection equipment according

to European guidelines* is mandatory if there is a risk of falling. The consequences of a fall are usually serious and often lead to permanent injury. The use of the correct equipment such as a harness belt and the correct connection equipment such as a lanyard with shock absorber prevents serious injury.

M-SAFE 4180 SLING ANCHOR POINT

The Sling anchor point is a mobile anchor point made of polyester tape. The anchor point has a length of 120 centimeters, a width of 20 millimeters and a maximum resistance of > 18 kN.

- > This sling complies with the EN 795 standard
- > Mobile anchor point made of polyester strap
- > Length: 120 cm
- > Width: 20 mm
- > Maximum resistance > 18 kN

Article number 8.84.180.00

M-SAFE 4172 FALL ARREST DEVICE XL WITH SHOCK ABSORBER 2 M

The fall arrest device XL with fall absorber 2 m includes a steel carabiner and aluminum scaffolding hook. The fall arrest device is suitable for vertical and horizontal use up to 100kg, with maximum resistance of 12kN, maximum angle of inclination of 40 ° and length of 2m.

- > Automatic retracting fall arrest device with 21 mm strap and equipped with shock absorber
- > Suitable for both vertical and horizontal use (maximum 100 kg)
- > Includes a steel carabiner (opening 18 mm) and an aluminum scaffold hook (opening 60 mm)
- > Casing made of very strong high impact strong polymer (PA 6) to prevent breakage

Article number 8.84.172.00

M-SAFE 4014 PREMIUM HARNESS 3D

The harness 3D features two attachment points and two quick-release fasteners. The harness has on the back and shoulder a comfortable padding and an ideal positioned leg / seat strap. The harness complies with the EN 361 standard.

- > Harness with two attachment points and two automatic buckles
- > Two attached textile loops on the chest to be connected with a carabiner (to be ordered separately) and an extended D-ring (with Velcro) on the back for fall protection
- > Equipped with an NFC chip under the label, intended for mapping users and tracking inspection deadlines
- > Can be used by persons weighing up to 140 kg (including equipment) and height between 160 and 185 cm

Sizes: S/M
Article number 8.84.014.00

M-SAFE 4182 MOBILE LANYARD

The 4182 mobile lanyard comes with two steel carabiners and is permanently fitted of a bag for storing excess tape. The lanyard is suitable for two users at the same time and has a maximum resistance of > 25kN.

- > Mobile horizontal lanyard with 30 mm polyester strap
- > Branched ends for anchoring an object directly, without the need for an anchor sling or connecting directly to a custom anchor point
- > Adjustable from 2 to 20 meters in length
- > Suitable for two users at the same time

Article number 8.84.182.00

MSA V-EDGE SINGLE MINI PFL FALL ARREST DEVICE 1.8 M

The V-Edge 1.8m Sharp Edge Resistant Fall Limiter is a lightweight solution that can be used in headwaters, chest level and foot level applications. This V-Edge version is equipped with a 1.8 meter lanyard, an aluminum Triple-Lock carabiner (harness connection) and an aluminum swivel scaffolding hook (anchoring connection). All V-EDGE PFLs have an individual serial number for full traceability.

- > The shock absorber ensures that the forces transferred to the user and anchorage are less than 6 kN
- > Transparent housing for visual inspection of internal parts
- > Two swivels (on anchor mount and housing) prevent the lanyard from twisting during use
- > An aluminum triple-lock carabiner provides maximum safety at attachment to harness D-ring

MSA V-FORM+ ARMOR 10

With the V-FORM + fall harness you can concentrate on the work, less on your harness. With two anchor points on the back and chest, quick release buckles and a light shoulder pad, this all-round harness version will support you in safely and comfortably performing various work at height.

- > Racing-style quick-release buckle provides a snug and comfortable harness - without clunky chest straps or awkward buckles
- > Special attachment point for personal fall limiter allows quick and easy attachment and keeps your back D-ring free for other uses
- > Coated Webbing, it repels dirt, grease and fought off
- > 140 kg Load capacity

YOUR STYLE AT WORK

Redbrick Motion S3

MOTION collection by
REDBRICK®

Majestic as an authority on PPE knows and understands that using PPE raises questions for you. "Are we still doing it right?", "What about the maintenance of our PPE?", "Are my employees still sufficiently protected against health and safety risks by using the current PPE?" The Majestic PPE Safety Scan offers a solution. Based on four steps, we work towards a situation in which people on the work floor continuously work with professional and contemporary PPE, which always meet the highest requirements. This removes or minimizes risks of physical injury.

Together for safety

With Majestic as a trusted discussion partner, we go through the PPE Safety Scan in close collaboration with you. Together with Majestic, we make an inventory of your activities and processes, analyze the use of current PPE and map out the needs. All this according to the PPE regulation

MAJESTIC PPE SAFETY SCAN

The Working Conditions Act contains rules for employers and employees to promote the health and safety of employees. The risks that one runs should be inventoried and evaluated. At all times, the so-called occupational hygiene strategy should be handled. A strategy involving different control measures - source measures, collective and individual measures, personal protective equipment - are applied.

2016/425. Based on clear information and instructions, we then work towards a professional PPE implementation and we build on a safety culture, in which awareness and holding each other accountable for behavior are important pillars.

Monitors

After phasing in a thorough package of PPE, it is important to conduct an evaluation on a frequent basis and make adjustments where necessary. We take care of this together with Majestic. Are the PPE still being used correctly? Do people still experience the same use convenience and comfort? Do the PPE still meet the set guidelines? Questions that require continuous attention not only at the start of the process, but also in the future. And attention... that makes everything better! <<

WORK IS LIFE

PROTECT IT.

Anyone who works in construction, logistics, transport or industry knows: good personal protection is indispensable. Then two things count: security and comfort. During work, but also afterwards. With OXXA® we defend our comfort zone. And the possibility to step outside of that, if we want to. Total protection of everything that is dear to us. Everything that turns time into quality time.

OXXA®
THE COMFORT OF SAFETY
